SURFA panel discussion

September 17, 2020

Important note to investors

This presentation contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 regarding Dominion Energy. The statements relate to, among other things, expectations, estimates and projections concerning the business and operations of Dominion Energy. We have used the words "anticipate", "believe", "could", "estimate", "expect", "intend", "may", "plan", "outlook", "predict", "project", "should", "strategy", "target", "will", "potential" and similar terms and phrases to identify forward-looking statements in this presentation. Such forward-looking statements, including 2020 operating earnings guidance and projected dividends for the remainder of 2020 and beyond, are subject to various risks and uncertainties. As outlined in our SEC filings, factors that could cause actual results to differ include, but are not limited to: the expected timing and likelihood of completion of the proposed transaction with Berkshire Hathaway Energy; the risk that Dominion Energy or Berkshire Hathaway Energy may be unable to obtain necessary regulatory approvals for the transaction or required regulatory approvals may delay the transaction; the risk that conditions to the closing of the transaction may not be satisfied; the repurchase of less than \$3 billion of Dominion Energy common stock through a share repurchase program; unusual weather conditions and their effect on energy sales to customers and energy commodity prices; extreme weather events and other natural disasters; extraordinary external events, such as the current pandemic health event resulting from COVID-19; federal, state and local legislative and regulatory developments; changes to federal, state and local environmental laws and regulations, including proposed carbon regulations; cost of environmental compliance; changes in enforcement practices of regulators relating to environmental standards and litigation exposure for remedial activities; capital market conditions, including the availability of credit and the ability to obtain financing on reasonable terms; fluctuations in interest rates; changes in rating agency requirements or credit ratings and their effect on availability and cost of capital; impacts of acquisitions, divestitures, transfers of assets by Dominion Energy to joint ventures, and retirements of assets based on asset portfolio reviews; receipt of approvals for, and timing of, closing dates for acquisitions and divestitures; the expected timing and likelihood of completion of the proposed transaction with Berkshire Hathaway Energy, including the ability to obtain the requisite regulatory approvals and the terms and conditions of such regulatory approvals; changes in demand for Dominion Energy's services; additional competition in Dominion Energy's industries; changes to regulated rates collected by Dominion Energy; changes in operating, maintenance and construction costs; timing and receipt of regulatory approvals necessary for planned construction or expansion projects and compliance with conditions associated with such regulatory approvals; adverse outcomes in litigation matters or regulatory proceedings; and the inability to complete planned construction projects within time frames initially anticipated. Other risk factors are detailed from time to time in Dominion Energy's quarterly reports on Form 10-Q and most recent annual report on Form 10-K filed with the Securities and Exchange Commission.

The information in this presentation was prepared as of July 31, 2020. Dominion Energy undertakes no obligation to update any forward-looking information statement to reflect developments after the statement is made. Projections or forecasts shown in this document are based on the assumptions listed in this document and are subject to change at any time.

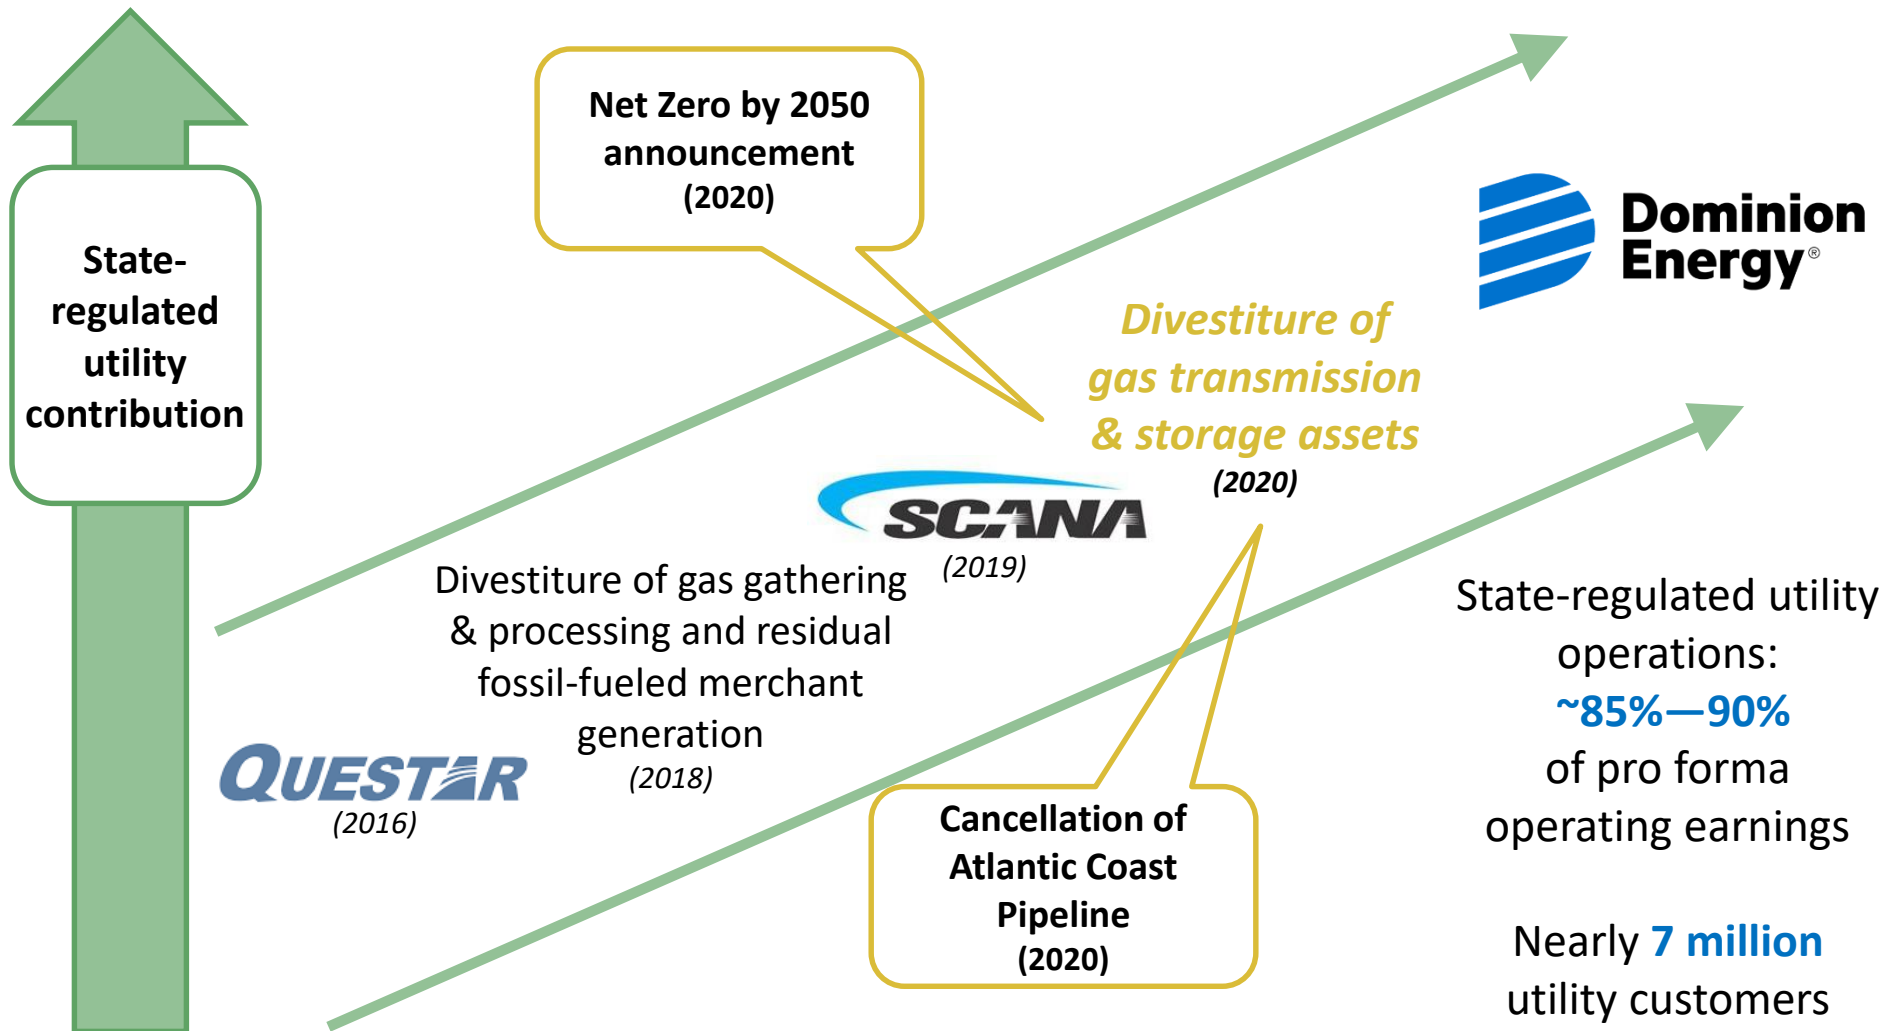

This presentation shall not constitute an offer to sell or the solicitation of an offer to buy securities. Any offers, solicitations or offers to buy, or any sales of securities will be made in accordance with the requirements of the Securities Act of 1933, as amended. This presentation has been prepared primarily for security analysts and investors in the hope that it will serve as a convenient and useful reference document. The format of this document may change in the future as we continue to try to meet the needs of security analysts and investors. This document is not intended for use in connection with any sale, offer to sell, or solicitation of any offer to buy securities.

This presentation includes certain financial measures that have not been prepared in accordance with U.S. generally accepted accounting principles (GAAP). In providing its full-year operating earnings per share guidance (non-GAAP), the company notes that there could be differences between such non-GAAP financial measure and the GAAP equivalent of reported net income per share. Reconciliation of such non-GAAP measure to net income per share is not provided, because the company cannot, without unreasonable effort, estimate or predict with certainty various components of net income. These components, net of tax, include but are not limited to, acquisitions, divestitures, impairment charges, changes in accounting principles, extreme weather events and other natural disasters. Please continue to regularly check Dominion Energy's website at www.dominionenergy.com/investors.

Dominion Energy's commitment to industry-leading environmental, social, and governance performance is driven by **our belief** that the best companies seek to:

- ✓ **Optimize returns to multiple stakeholders** including shareholders, employees, customers, and communities
- ✓ Strive to operate in an **environmentally responsible** manner

Significant strategic repositioning since 2016

Investment proposition

ESG themes play a key part of messaging and engagement

Premier **state-regulated utility** operations

Industry-leading **clean energy** profile

Attractive long-term **earnings** and **dividend** growth

Robust **credit** profile and **balance sheet**

Narrowed **focus** enhances **consistency** and **transparency**

Zero and low carbon electric generation evolution

Electric generation by fuel type (MWH)

Fuel Type	Past: 2005	Present: 2019	Future: 2035 (est)	Carbon Footprint Summary
Renewables	1%	4%	33%	~68% zero carbon
Nuclear	36%	42%	35%	
Natural gas	7%	42%	26%	~94% zero/low carbon
Coal	52%	12%	6%	
Other	4%	1%	0%	

Note: 2005 and 2019 historical data pro forma for SCANA. All data excludes Bath County and Fairfield pumped storage
